

# CMSC 435

## Antialiasing

# Aliasing

- Visual artifacts
  - jagged lines and edges
  - high frequencies appearing as low
  - small objects missed
  - texture distortions
  - strobing and popping
  - backward movement

**No antialiasing**

# Rendering Process

- Two basic stages
  - sampling
  - reconstruction
  
- Assuming discrete sampling

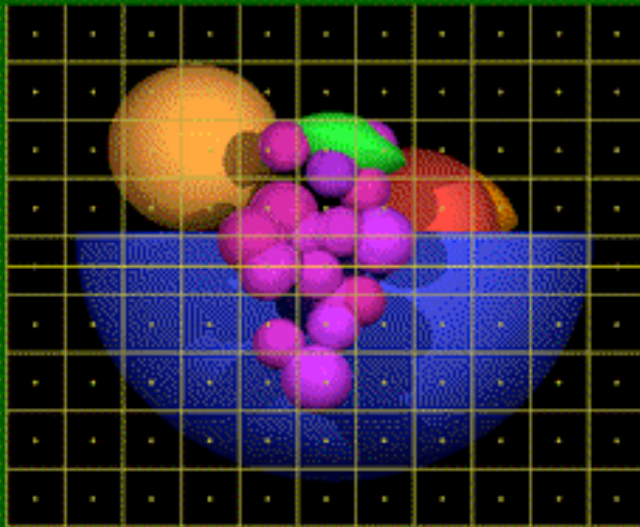

**Original  
scene**

**Luminosity  
signal**

**Sampling at  
pixel centers**

**Sampled  
signal**

**Rendered  
image**

**Luminosity  
signal**

*Original*

*Rendered*

**Prefiltering methods examine areas of color within a pixel.**

*Hello World*

*Hello World*

**A demonstration**

**No antialiasing**

W

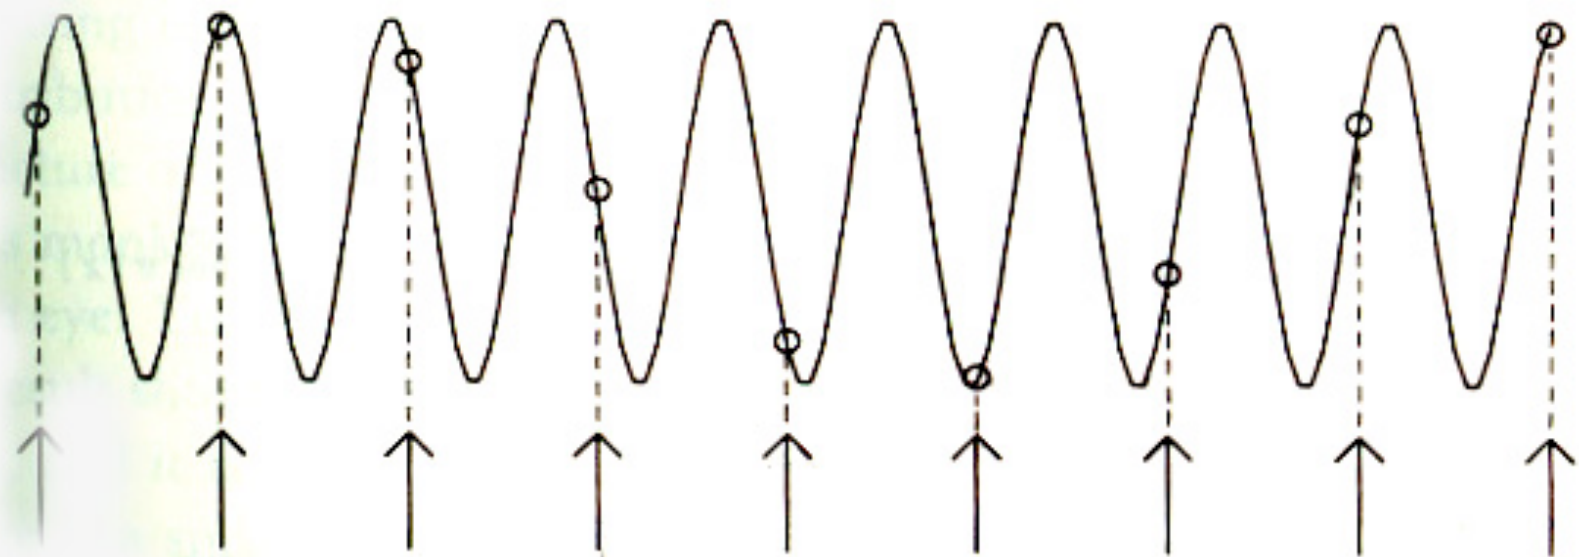

**Prefiltering**

# Sampling Theory

- Shannon's sampling theory (1D):
  - A band limited signal  $f(t)$  with cut off frequency  $w_F$  may be perfectly reconstructed from its samples  $f(nT_0)$  if  $2\pi/T_0 \geq 2w_F$
  - $w_F \Rightarrow$  Nyquist limit
- Alternatively:
  - a signal can be reconstructed exactly from samples only if the highest frequency is less than half the sampling rate

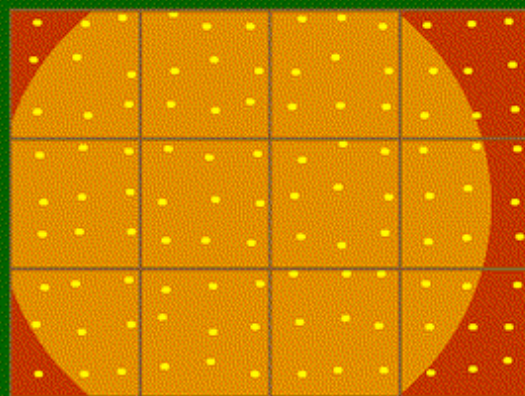

# Sampling Schemes

- Regular supersampling
- Jittered supersampling
- Adaptive supersampling
- Stochastic sampling

*Jittered*

*Regular*

**Taking 9 samples per pixel**

Fig. 12c. Comb rendered with a regular grid, one sample per pixel.

Fig. 12d. Comb rendered with a jittered grid, one sample per pixel.

(a)

(b)

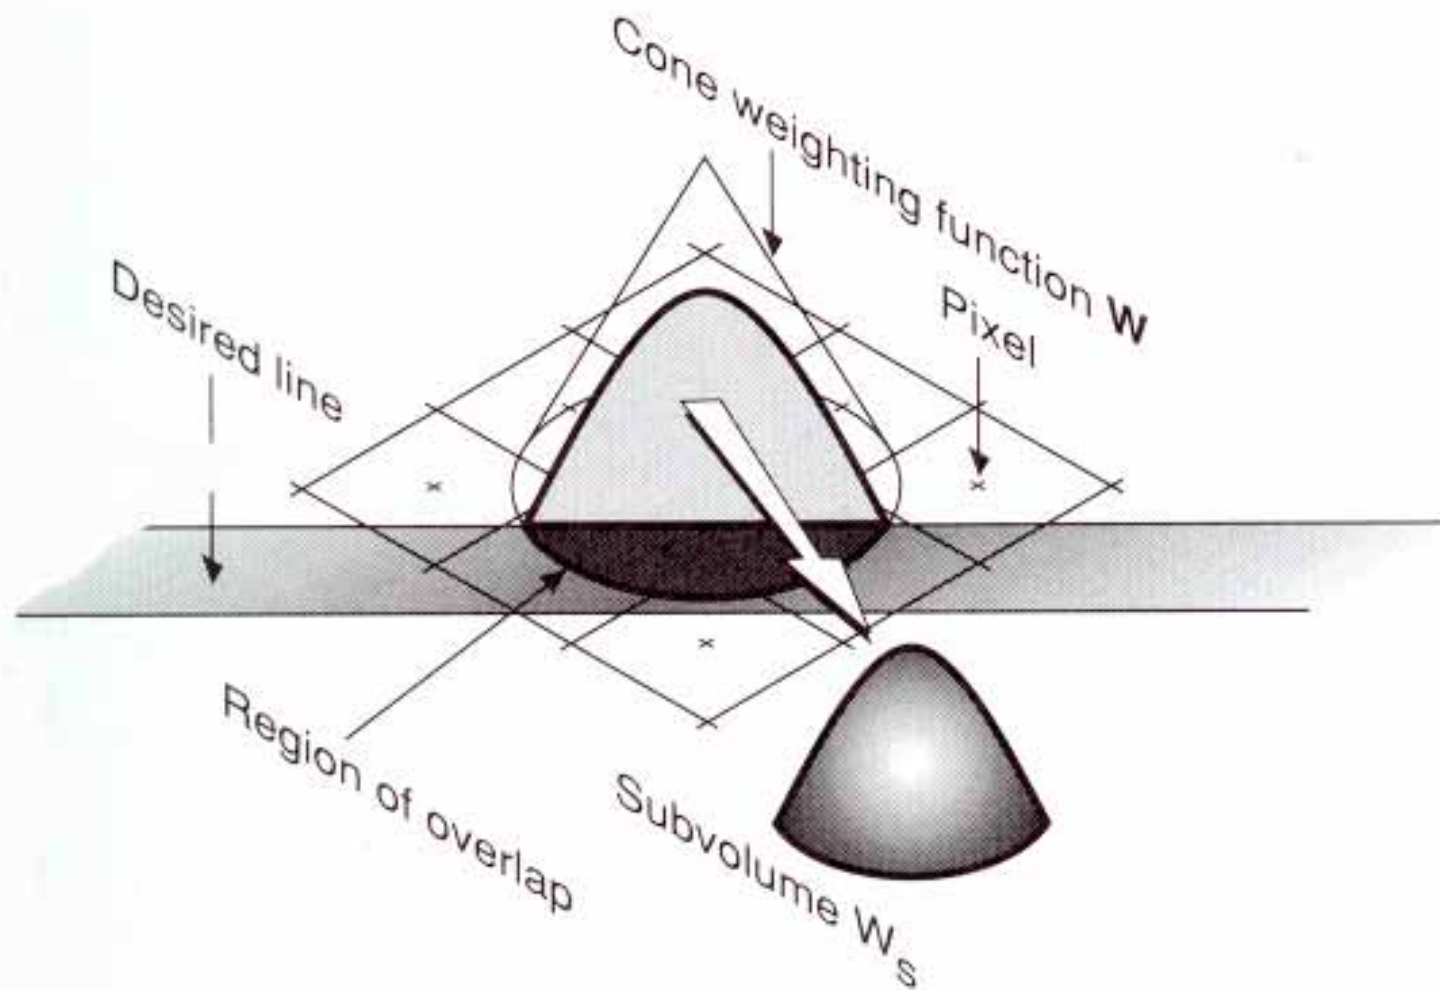

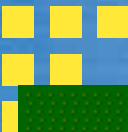

# Reconstruction

- Reconstruction: recreate a continuous signal from a set of samples
- Tasks of reconstruction filter
  - remove extraneous replicas of signal spectrum
  - pass the original signal base unchanged

$\frac{1}{16}$	$\frac{1}{8}$	$\frac{1}{16}$
$\frac{1}{8}$	$\frac{1}{4}$	$\frac{1}{8}$
$\frac{1}{16}$	$\frac{1}{8}$	$\frac{1}{16}$

*Combines  
nine  
samples*

**Filters combine samples  
to find a pixel's color.**

$\frac{1}{16}$	$\frac{1}{8}$	$\frac{1}{16}$	$\frac{1}{16}$	$\frac{1}{8}$	$\frac{1}{16}$
$\frac{1}{8}$	$\frac{1}{4}$	$\frac{1}{8}$	$\frac{1}{8}$	$\frac{1}{4}$	$\frac{1}{8}$
$\frac{1}{16}$	$\frac{1}{8}$	$\frac{1}{16}$	$\frac{1}{16}$	$\frac{1}{8}$	$\frac{1}{16}$
$\frac{1}{16}$	$\frac{1}{8}$	$\frac{1}{16}$	$\frac{1}{16}$	$\frac{1}{8}$	$\frac{1}{16}$
$\frac{1}{8}$	$\frac{1}{4}$	$\frac{1}{8}$	$\frac{1}{8}$	$\frac{1}{4}$	$\frac{1}{8}$
$\frac{1}{16}$	$\frac{1}{8}$	$\frac{1}{16}$	$\frac{1}{16}$	$\frac{1}{8}$	$\frac{1}{16}$

*Samples*

This filter  
computes  
a weighted  
average.

*Pixels*

**No antialiasing**

**3x3 supersampling**  
**3x3 unweighted filter**

**3x3 supersampling  
5x5 weighted filter**

**3x3 jittered supersampling**  
**5x5 weighted filter**
